EXPERIENCE

Louisa AI

Principal Engineer

Mar 2025 - Present

Run lean teams shipping AI at scale. Architected Space-Time Overlaps scoring 1.4B+ relationship records, and a Graph Service over millions of email relationships with separated Worker/API layers for independent horizontal scaling. Shipped AI agents with multi-tool-call orchestration and MCP servers exposing external connectors. Set perf testing standards and deployed organization-wide automated release management using Release Please

Ollion

Lead Product Developer

Apr 2023 - Mar 2025

Core team of DataPipes, a cloud-native Data Management Platform. Led developers, owned microservice code and infra, drove Vue2 to Vue3 migration, managed pre-sales at international tech events.

Senior Developer

Apr 2022 - Apr 2023

Owned critical components, spearheaded Webpack to Vite migration, partnered with UX on front-end performance.

Developer

May 2021 - Apr 2022

Led Javascript to Typescript migrations, optimized containerization, built web pages and REST APIs.

Cardinal Health

Associate Software Engineer

Jun 2019 - May 2021

Deployed NodeJS/React systems on k8s, launched the Admin Console MVP, served as technical interviewer for campus recruitment drives. Automated on-call systems to reduce resolution times from > 30 mins to <1 min.

Software Engineering Intern

Jan 2019 - Jun 2019

Built Serverless Framework microservices and a shared library of reusable modules.

LANGUAGES

English - Advanced Hindi - Proficient Tamil - Intermediate
Malayalam - Intermediate

PROJECTS

3rdAI

Semantic lyric based AI search & research platform for song discovery and cross language playlist generation over millions of songs, 129-language corpus.

AI Influencer Marketing Platform

End-to-end influencer marketing automation platform with AI-powered creator discovery, automated outreach & negotiation, contract management with e-signatures, milestone-based payment processing, real-time performance analytics, and comprehensive campaign lifecycle management.

Expense Tracker PWA

Privacy-first, open-source PWA for tracking and analyzing personal expenses. No accounts, no backend; all data stays on device. E2EE encrypted.

SKILLS

Coding languages

Typescript Javascript Python Shellscript

Frontend

Vue React Vite SSR Playwright PWA

Backend

NodeJS Bun Hono ORPC Express NestJS WebSockets
Postgres Neo4j NATS Redis Airflow Pyspark

Devops

AWS GCP CICD Docker k8s HELM Terraform
GitHub Actions

AI
